

FOR AMERICAS

OPEN INNOVATION FOR INTERIOR DESIGN

Over 50 years of research and technology.

Arpa is an innovative catalyst in the design world, working side by side with its partners “co-creating” outstanding “Made in Italy” solutions. Since 1954 Arpa Industriale has been designing and manufacturing panels with high quality HPL technology for the most diverse applications: from architecture to interior design, from healthcare to shipyards, from transport to hospitality, from retail to kitchens. Arpa offers a vast range of choices of products, extremely varied in both structure appearance and function. With over 50 years of experience and investment in our 1.6 million square foot plant in Bra, Piedmont, Arpa's products express all the lively and original creativity that the “Made in Italy” label stands for. We are an industrial firm with an expert staff and a manufacturing flexibility of unrivaled range and service in the HPL world.

ARPA DESIGN CENTRE, NEW YORK

The image is a black and white photograph of the Arpa Design Centre in New York. In the background, a large wall is covered in a grid of small, circular perforations, some of which are illuminated from within, creating a pattern of light and shadow. The word "Arpa" is prominently displayed in a serif font, with a stylized graphic of horizontal lines to its right. In the foreground, there is a modern, minimalist furniture display. It includes a long, dark wooden table with a white drawer unit underneath. To the right of the table is a tall, white modular shelving unit with various compartments, including open shelves, drawers, and a section with a grid of small circular holes. On the shelves, there are several glassware items, including wine glasses and bottles. The overall aesthetic is clean, modern, and functional.

Arpa

Inspiration, relation and information are the stirring principles of Arpa Design Centres; the new concept for Arpa showrooms.

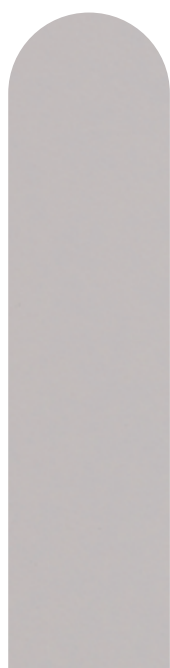

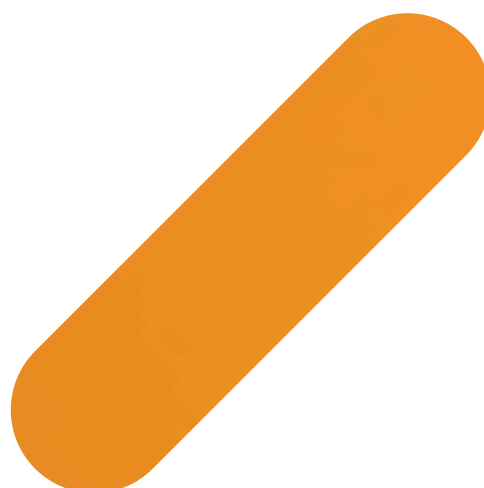

Arpa's showroom is located in SoHo, the artistic and creative heart of New York City, the center for contemporary excellence. Here Arpa has established a foothold allowing us to interact directly with the American community of architects and designers. On display are Arpa's unique products and colorful collections in this 7,500 square foot showroom center jointly run with Trespa, the exterior façade manufacturing market leader.

Aesthetic expressions are inspired by nature and its colors, by technology and its products, by light and its poetic hues. Marbles, granites, onyx and other stones beautifully replicated express all the delicate, natural shades of minerals. Metal laminates, in multiple colors and innovative textures, speak a language of shiny, technological and functional elegance.
